DESCRIPTORS	Academic Education; *College Curriculum; Community Colleges; Courses; Curriculum Research; Day Students; *Enrollment Trends; Evening Students; General Education; *Instructional Programs; *Intellectual Disciplines; *Junior Colleges; Multicampus Districts; Statistical Data; Tables (Data); Technical Education; Vocational Education
IDENTIFIERS	Los Angeles Community Colleges CA; Weekly Student Contact Hours

ABSTRACT

This report presents weekly student contact hours (WSCH) by discipline and instructional program for day and evening students enrolled in the Los Angeles Community College District (LACCD) for fall semesters 1973-1977. In fall 1977, the district offered 224 instructional programs compared to 215 in fall 1973; 18 programs had been deleted and 26 new ones added. WSCH data for the district's 10 largest disciplines (business and management, education, fine and applied arts, social science, letters, engineering, mathematics, physical science, psychology, and health professions) indicated that business and management has been the largest discipline since fall 1973. Within business and management, management, real estate, marketing, office machines, and travel programs showed significant gains in fall 1977. Social science, the second largest discipline since 1973, dropped to fourth in 1977. It was replaced by education, which showed increases in special, cooperative, physical, and health education program enrollments. Due to the new Learning Skills program, Interdisciplinary Studies showed the largest gain in 1977 (26.1%). Public Affairs and Services exhibited the greatest decline (27.9%). The data are displayed in tabular format. (Author/TR)

GLOSSARY

Census is a fixed time during the semester when counts of enrollment and weekly student contact hours are taken for State reporting purposes. There are currently two census weeks per semester.

Classification of Instructional Disciplines (CID) codes are a system of four-digit numbers used throughout California for the classification of disciplines and instructional programs. CID codes define 23 major disciplines as distinguished by the first two digits of the code. Specific instructional programs within each discipline are identified by the last two digits of the code.

Day classes are those classes beginning before 4:30 p.m.

Disciplines are major subject fields composed of a number if instructional programs.

Evening classes are those classes beginning at 4:30 p.m. or later.

Full-time Equivalent (FTE) Enrollment is derived by dividing WSCH by 15. One full-time equivalent student represents 15 credit hours in scheduled instruction.

Instructional Programs or Programs are organized sequences of courses covering related subject matter and comprising a Discipline.

Weekly Student Contact Hours (WSCH) are computed by multiplying the number of students enrolled in a class by the number of hours per week for which the class meets. A class with ten students which meets three times a week would thus generate 3 x 10 or 30 WSCH.

INTRODUCTION

This Research Report presents weekly student contact hours (WSCH) in disciplines and instructional programs for the District and for each college in the District. Data are presented for both day and evening classes for the Fall semester of each Academic year from 1973 to 1977. It is intended that these data will serve as a reference to colleges in the areas of curriculum planning, faculty workload analysis, and resource allocation.

Data are presented for each instructional discipline as well as for each program within the discipline, as identified by Classification of Instructional Discipline (CID) codes. The terms "discipline" and "instructional program" as used in this report are explained in the Glossary. A complete list of the instructional programs comprising each discipline is provided on pages 4 through 9.

Data for Fall 1973 and Fall 1974 were taken from CCAF-132, Enrollment and Faculty by Discipline; data for Fall 1975 through Fall 1977 were taken from the WSCH By Subject Report. Information on both of these reports is provided by the colleges via their inputs to the Section Data Base.

For the purposes of this report, programs "added" refers to those programs generating WSCH for the first time. Similarly, programs "dropped" refers to those programs which have stopped generating WSCH. Between Fall 1973 and Fall 1977 the District added 26 new programs and dropped 18. A listing of the programs added and dropped is provided on pages 10 and 11, respectively. The college at which the program was first added or from which it was last dropped is also indicated. In Fall 1977 the District offered a total of 224 instructional programs, compared to 215 in Fall 1973.

WSCH from 1973 to 1977 in the District's ten largest disciplines are presented in Figure 1. Business and Management (0500) has been the District's largest discipline each Fall since 1973. Within this discipline, programs showing significant gains in 1977 include Management (0506), Real Estate (0511), Marketing (0534), Office Machines (0538), and Travel (0542).

Social Science (2200), which had been the second largest discipline since 1973, dropped down to fourth place. In Fall 1977, Education (0800) was the second largest discipline in the District. This is mostly attributable to the increases in Special Education (0808), Cooperative Education (0850), Physical Education (0835), and Health (0837).

Interdisciplinary Studies (4900) showed the largest gain this year (26.1%) due to the new Learning Skills (4999) program. The largest decline (-27.9%) was in the Public Affairs and Services (2100) discipline, probably attributable to the recent transfer of several Administration of Justice and Correction courses to non-apportionment status (non apportionment classes are not included in these WSCH data).

The implications of program WSCH in curriculum planning, will be discussed in a forthcoming Management Information System report which identifies critical "marginal" programs at each campus. Also, a more complete discussion of current enrollment and WSCH trends may be found in Research Report #78-01, Enrollment and Attendance: 1968 - 1978.

Districtwide WSCH information may be found on pages 14 through 81. Data for disciplines are presented prior to data for instructional programs within those disciplines. Data for individual District colleges follow the District section, with each college printed on a different color of paper.
